

# MAXIMA light. Size considerations.

"MAXIMA light is based on the same axis measurement of 990mm units as the other OCTANORM products and can be used in combination with them. A rich variety of parts and sizes, including MAXIMA light square 120 beams (L870, framed space 990) and square 80 beams (L910, framed space 990), enables you to create a rich variety of forms to give distinction to any space."
